OBJECTIVE

Data scientist with 6 years of software engineering experience building scalable enterprise systems and data workflows, and distributed analytics pipelines using Python, SQL, Spark, and AWS. Completed M.S. in Data Science from UCSD focused on LLMs, knowledge graphs, ML models, data analytics, NLP & ETL systems and big data.

SKILLS

Languages:	Python, SQL, Cypher
Data Engineering:	ETL pipelines, Data modeling, Data transformation
Data Science:	EDA, NLP, Machine Learning, NER
Databases & Platforms:	AWS, Neo4j, Salesforce CRM
Visualization:	Tableau, Matplotlib, Seaborn
Tools & Frameworks:	NumPy, Pandas, Scikit-Learn, Spark, Dask, Git

PROJECTS

LLM-Based Information Extraction & Knowledge Graph System, aditidas3/Evidence-Exploration Sep 2025 - Present

- Built a scalable, schema-constrained LLM extraction framework to transform large-scale enterprise documents (30M+ records) into graph-ready JSON, achieving 100% schema compliance and evaluated via precision/recall and ER metrics.
- Implemented a Neo4j knowledge graph using LLM-based entity & relationship extraction, incorporating LLM-driven entity resolution achieving 95% accuracy optimizing graph quality, degree distribution and duplicate reduction.
- Created a natural language query interface that converts user queries into structured representations and returns evidence-backed subgraphs with explainable reasoning, achieving low query latency and high retrieval accuracy.

Sephora Product Reviews Analysis, github.com/aditidas3/Sephora_product_review_analysis Sep 2024 - Dec 2024

- Analyzed 50K+ customer reviews from Kaggle datasets to extract insights on sentiment, skincare concerns and product recommendation likelihood, applying NLP, topic modeling, and machine learning techniques.
- Progressed from baseline logistic regression to tree-based models to XGBoost achieving AUC of 0.83.
- Demonstrated that review sentiment & topic level concerns are key predictors of product recommendations.

EXPERIENCE

Deloitte USI, Consultant Mar 2022 - Aug 2023

- Led implementation of 2 Salesforce CPQ systems, focusing on data-driven pricing, configuration logic and workflow automation to support business analytics and reporting needs.
- Collaborated with cross-functional teams to translate business needs to structured data and scalable system designs.
- Developed and customized solutions using Apex, Visualforce, and LWC, ensuring high-quality and reliability across systems.

Lister Technologies (acquired by Bounteous Sol.), Sr. Software Engineer Apr 2020 - Mar 2022

- Contributed to the development and customization of Sales, Service, and CPQ cloud solutions, reporting and data analysis
- Played a key role in building the App Analyzer AppExchange app to track usage patterns of installed packages and applications, analyze their data impact, and assess application productivity and organizational health through reporting.

Cognizant Technology Solutions, Web Developer Nov 2017 - Apr 2020

- Developed and maintained web applications built on Drupal 7 for a healthcare client, supporting structured content management.
- Supported e-commerce website and internal systems built on Magento 1.7 & CakePHP 3.0

EDUCATION

University of California, San Diego, CA Sep 2024 - June 2026

M.S in Data Science and Engineering, 3.85 GPA

Birla Institute of Technology, Mesra, JH, India Aug 2013 - June 2017

B.E in Electrical and Electronics Engineering, 7.8 CGPA, Distinction

CERTIFICATIONS

- Salesforce CPQ Specialist
- Salesforce Certified Platform Developer I
- Salesforce Certified Administrator
