PROFESSIONAL SUMMARY

Data Scientist with an M.S. in Data Science and 6 years of software engineering experience building enterprise-scale applications and data-intensive systems. Skilled in machine learning, NLP, LLMs, knowledge graphs, and data pipelines using Python, SQL, Spark, AWS, and Neo4j. Adept at translating complex business problems into production-grade data products.

TECHNICAL SKILLS

Programming: Python, SQL, Cypher

Machine Learning: Supervised/Unsupervised Learning, NLP, NER, Topic Modeling, Feature Engineering, Model Evaluation

Generative AI & LLMs: Information Extraction, Knowledge Graphs, Entity Resolution, Prompt Engineering

Data Engineering: ETL Pipelines, Data Modeling, Data Transformation, Data Quality, Docker

Cloud & Databases: AWS (S3, EC2, SageMaker), Neo4j, Salesforce CRM

Visualization: Neo4j, Tableau, Matplotlib, Seaborn

Tools & Frameworks: NumPy, Pandas, Scikit-Learn, Spark, Git

PROJECTS

LLM-Based Information Extraction & Knowledge Graph System, [/aditidas3/Evidence-Exploration](#) Jan 2026 – Jun 2026

- Built a scalable, LLM extraction framework to transform large-scale unstructured and complex documents (30M+ records) into graph-ready JSON, achieving 100% schema compliance and evaluated via precision/recall and entity resolution metrics.
- Implemented a Neo4j knowledge graph using LLM-based entity and relationship extraction, incorporating LLM-driven entity resolution achieving 95% accuracy, optimizing graph quality, degree distribution, and duplicate reduction.
- Created a natural language query interface that converts user queries into structured representations and returns evidence-backed subgraphs with explainable reasoning, achieving low query latency and high retrieval accuracy.

Sephora Product Reviews Analysis, [/aditidas3/Sephora_product_review_analysis](#) Sep 2024 - Dec 2024

- Analyzed 50K+ customer reviews from Kaggle datasets to extract insights on sentiment, skincare concerns, and product recommendation likelihood, applying NLP, topic modeling, and machine learning techniques.
- Built and evaluated machine learning models progressing from logistic regression to XGBoost, achieving an AUC of 0.83.
- Demonstrated that review sentiment and topic-level concerns are key predictors of product recommendations.

Population Health Survey Clustering Analysis, [/aditidas3/CDC_BRFSS_project](#) Sep 2025 - Dec 2025

- Applied K-Means clustering with PCA-based dimensionality reduction (994 to 413 features, retaining 95% variance) to CDC BRFSS survey data to identify population response patterns.
- Evaluated cluster quality against ground-truth survey responses using silhouette score and false positive/negative analysis, diagnosing K-Means limitations on heterogeneous categorical data and recommending Hierarchical Clustering, DBSCAN, and Gaussian Mixture Models as better-suited alternatives.

PROFESSIONAL EXPERIENCE

Deloitte, Consultant Mar 2022 - Aug 2023

- Led implementation of 2 Salesforce CPQ systems, focusing on data-driven pricing, configuration logic, and workflow automation to support business analytics and reporting needs.
- Collaborated with stakeholders and cross functional teams to translate business needs into structured data & scalable system architectures and data solutions.
- Developed and customized solutions using Apex, Visualforce, and LWC, ensuring high quality and reliability across systems.

Lister Technologies (acquired by Bounteous Sol.), Sr. Software Engineer Apr 2020 - Mar 2022

- Developed and customized sales, service, and cpq cloud solutions, including reporting and data analysis.
- Played a key role in building the App Analyzer AppExchange app to track usage patterns of installed packages and applications, analyze data impact, and assess application productivity and organizational health.

Cognizant Technology Solutions, Programmer Analyst Nov 2017 - Apr 2020

- Developed and maintained web applications and e-commerce systems built on drupal 7, magento 1.7, and cakephp 3.0 for healthcare and retail clients, supporting structured content management and internal systems.
- Improved application reliability and maintained structured content and transactional data systems.

EDUCATION

University of California, San Diego Sep 2024 - June 2026

M.S. in Data Science and Engineering, 3.85 GPA

Birla Institute of Technology, Mesra Aug 2013 - June 2017

B.E. in Electrical and Electronics Engineering, 7.8 CGPA, Distinction

CERTIFICATIONS

Salesforce CPQ Specialist • Salesforce Certified Platform Developer I • Salesforce Certified Administrator
